

PROFILE

With **20 years of development experience, 15 years in leadership roles, and 5 years specializing in artificial intelligence**, I bring a unique blend of technical expertise and strategic vision. I am deeply passionate about R&D, consistently staying at the forefront of industry trends. My strong research capabilities have led to multiple successful **technology-to-industry implementations** from academic papers. I have managed teams of over 100 members, delivering complex projects with efficiency, innovation, and sustainable impact.

PERSONAL INFORMATION

Ph.D. Candidate in Intelligent Science and Systems

@jiangtai20@mails.ucas.ac.cn

☎ +86 138 1093 5087

✉ 1st Xi'erqi road, Haidian, Beijing

SKILLS

- Server, DevOps
- Frontend, 3D
- Blockchain, Web3
- AI, ML, DL, RL
- Team Managing

HOBBIES

Sport: Badminton, Skating, Bowling, Archery.

Miscellaneous: Astronomy, Zoology, Consumer Psychology.

WORKS

ARCHITECTURE at **Institute of Automation, Chinese Academy of Sciences.** **2019.7–pres.**

- ◇ Lead research team in projects involving image recognition, speech recognition, large language model applications, and decentralized science (DeSci).
- ◇ Designed and implemented frameworks for blockchain, DAO governance, smart contracts, Web3.0, and recursive inscriptions.
- ◇ Applied reinforcement learning to route planning, simulation, and engineering optimization.
- ◇ Developed solutions in multi-object detection, augmented reality, and 3D reconstruction, achieving successful real-world deployments.

ARCHITECTURE at **JD.com, inc.** **2018.4–2019.7**

- ◇ Built and optimized enterprise software frameworks, enhancing development efficiency and cross-project consistency.
- ◇ Developed auction and recycling systems from concept to production.
- ◇ Created a reusable component library adopted across multiple teams.
- ◇ Managed and coordinated a team of 100+ members, ensuring timely delivery of high-quality products.

CTO at **Vogso Ltd. (Hong Kong).** **2010.8–2018.3**

- ◇ Led system architecture, technology selection, and product development for web and game platforms.
- ◇ Established and scaled a high-performing development team, opening a new branch office to support expansion.
- ◇ Oversaw project delivery, ensuring performance optimization and long-term maintainability.

ENGINEERING at *Our Palm inc.* **2008.3–2010.7**

- ◇ Developed real-time combat systems for online games, achieving 10,000+ daily active users.
- ◇ Optimized database performance and gameplay systems to improve user engagement.

LECTURER at *Xinhua Computer College.* **2004.4–2008.3**

- ◇ Taught web development and computer fundamentals to undergraduate students.
- ◇ Developed teaching materials and improved curriculum delivery.

EDUCATION

PH.D. DEGREE WITH THE INSTITUTE OF SYSTEM ENGINEERING. *Intelligent Science and Systems. Macau University of Science and Technology.* **2023–2026**

- ◇ Conducted research integrating large-scale AI models with blockchain, delivering solutions successfully applied in industry, agriculture, and publishing.

MASTER. Artificial Intelligence and Application. *University of Chinese Academy of Sciences.* **2020–2022**

- ◇ Thesis title: *Smart Resale Based on Multi-Object Detection and Augmented Reality.*
- ◇ Achieved GPA 3.9 (top of class) in machine learning, deep learning, and reinforcement learning.
- ◇ Contributed to teaching materials and designed an AlphaGo lesson plan still in active use.

BACHELOR. Computer Network. *Xijing University.* **2001–2005**

- ◇ Won First Prize in the city-level C Language Competition.
- ◇ Earned CCNA Network Engineer certification.
